Proactive and adaptable web developer with strong communication and time management skills. Detail-oriented software architect looking for an opportunity to leverage full stack coding proficiencies and grow as a professional programmer.

Education

Sep 2013 - Jan 2018

- **Mechatronics Engineering**
[Tafila Technical University](#)

Sep 2023 - Sep 2024

- **Full Stack Web Development Program**
[A Plus Academy, Amman](#)

Comprehensive program covering all aspects of web development, from front-end technologies (HTML, CSS, JavaScript, Angular 15, etc.) to back-end technologies (.NET Core Web APIs, MVC, OOP, etc.). The program also included topics and skills about Design Patterns, problem solving, Debugging, ..., etc.

The program offered 370 hours (around 12 months) given by a 10+ years experienced instructor in the field of software engineering. And at the end of this program, I created a complete project for E-Restaurant Solution and used .NET Core Web API with EF Core as a back-end, Angular 15 with Material design as a front-end, and SQL as a Database. I also deployed the website on AWS Servers.

Employment

Aug 2023 - Aug 2024

- **EV Charging Equipment Specialist**
[Alpha-EV, Amman](#)

- Assembly and testing of electric car charging stations, ensuring compliance with safety and performance standards.

May 2021 - Aug 2023

- **Supervisor Assistant**
[T-Mart, Irbid](#)

- Management of inventory.
- Supervision and training of junior staff.

May 2019 - Mar 2020

- **Digital Design (CMOS VLSI Designer)**
[Golden Electronics, Amman](#)

- Design and simulation of CMOS circuits for VLSI applications.
- Testing and validation of circuit designs.

Languages

Arabic

English

Tools

- Git/GitHub and Azure DevOps.
- Visual Studio Code
- IIS Hosting
- Visual Studio
- Microsoft SQL Server Management Studio
- AWS Services (EC2, S3, and RDS)

Projects

- **E-Restaurant Solution**

An e-restaurant solution is a software or platform that helps restaurants manage their online presence and operations. This can include features such as online ordering, delivery management, reservations, and customer relationship management. E-restaurant solutions can help restaurants improve efficiency, streamline operations, and increase sales.
- **Wedding Hall Reservation**

A Wedding Hall Reservation system enables users to easily book wedding venues and related services such as car rentals. Through a user-friendly website, individuals can search for available wedding halls, compare prices, select services, and confirm bookings online. The system allows users to schedule events, add notes, and make secure electronic payments. Additionally, it saves reservation history for future reference, ensuring a convenient and efficient booking process.
